Services List

Drain Cleaning

We specialise in drain cleaning and drain maintenance and utilize our custom built vehicles fitted with the latest equipment available

- High Pressure water jet cleaner
- C.C.T.V. diagnostic camera
- Electronic Underground locator

Stormwater Pit Cleaning

Our vacuum excavation trucks are the safest and most cost effective method of cleaning silts and debris from surface drains, detention tanks, trash screens and silt arrestors.

Hydro Vacuum Excavations

Our combination high pressure water and vacuum truck are the safest and most cost effective method of excavating near services such as water, gas, electricity, and telecommunications, especially fibre optic cables.

High Pressure Water Cleaning

Utilising our pressure hose and hand lance we can pressure clean most surfaces to remove oil stains, chewing gum and mould.

Replacement Grates and covers

We supply and fit replacement grates and covers for most installations including galvanised steel, cast iron, concrete and polyethylene.

Hot Water Systems - Maintenance - Repairs – Installation

We specialise in the supply and installation of domestic, commercial and solar hot water systems. As well as all types of repairs and maintenance.

Backflow Prevention – Design – Installation – Testing

Hogans Plumbing can install, repair and conduct testing of backflow prevention devices.

Rainwater Tanks – Supply – Installation – Testing

Design, supply, installation and maintenance of poly, metal, concrete, and underground rainwater tanks. Rainwater tanks are a great way of conserving Australia's limited resources, as well as saving money on your water bill.

Thermostatic Mixing Valves – Installation – Testing

Installation, repair and testing of all thermostatic mixing valves.

Electronic Pipe location And Leak Detection

Leak detection and pipe location. With the latest equipment it is possible to identify leaks and pipes without costly excavation and damage to buildings.

Toilet- Repairs – Replacement – Servicing

Hogans Plumbing specialises in toilet suite repair, replacement and servicing if your toilet will not stop running, it leaks or is not fitted to the base correctly. By fixing your leaking toilet, you could save precious water and reduce your water bills.

Tap – Repairs – Replacement – Servicing

If you are tired of your leaking taps, have taps that do not turn off easily or simply want to upgrade your tap ware, tap repair, replacement and servicing we can do it all.

Roof & Gutter – Repairs – Installation

Repair and renewal of roofs gutters as well as their ongoing maintenance.

By ensuring our gutters, downpipes and stormwater lines are maintained, you minimise the chance of flooding and damage to your property foundations.

Preventative Maintenance Programs

Preventative maintenance programs are a great way of ensuring our customers have trouble free plumbing and business experience reduced downtime.

Sewer & Stormwater – Repairs & Replacement

Locating, excavation, repair and replacement of sewer and stormwater services.

Our company is fully insured and has home warranty insurance for those larger jobs. We pride ourselves on being able to fix all our customers jobs, large or small.

Gas Service – Repairs – Installation - Maintenance

We design, repair, instal and carry out maintenance of all gas services. Whether it is a new service installation or an older system, we have a solution for you.

Grease and Silt Arrestors – Supply – Installation – Maintenance

Supply, installation and maintenance of all grease and silt arrestors.

Fire Hydrants – Supply – Installation – Maintenance

Our company can design your fire hydrant system as well as supply, installation and provide maintenance.

Plumbing & Drain Cleaning Service

Our talented team of plumbing technicians can work on anything commercial, industrial and residential related. We can help with maintenance plumbing, hot water repairs and installation, gas fitting, blocked drains and emergency plumbing, roof or storm water plumbing and much more. All of our plumbers provide you honest, reliable and fast service, while remaining 100% dedicated and professional.

SERVICE VEHICLES AND EQUIPMENT

Hogans Plumbing vehicles are easily identified by their distinctive logo and signage and have been specifically designed to accommodate the latest technology in high pressure water drain cleaning, C.C.T.V. inspection and locating equipment.

High-pressure Water jet – used to clear sewer and stormwater pipes. Utilising varied pressure cutting heads, a powerful force of water pulverises root growth, breaks up sludge and debris and penetrates grease to clear blockages.

CCTV Camera – used to locate the source of blockages. The drain camera image determines whether drain maintenance is the appropriate follow-up or whether excavation is required, ensuring the most cost-effective solution for customers.

Pipe Locator – used to pinpoint the exact location of blockages, saving time and money by preventing excavation in the wrong location.

Administration

Trade Licences

Hogans Plumbing holds contracts licence no 217032

Insurances

Hogans Plumbing is fully insured for workers compensation and public liability.

Workers health & safety (WHS)

Hogans Plumbing technicians are trained in WH&S height safety, confined space awareness, C.C.T.V. operations, electronic pipe location and high pressure water jet cleaning.

Service technicians and personnel

Hogans Plumbing employ only fully trained tradesmen who demonstrate a willingness to be punctual and please our clients and wear our uniform with pride. Hogans Plumbing invests heavily in the ongoing training of apprentices to ensure future quality tradesmen.

Administration

Hogans Plumbing Services has three managers and three office staff who are fully conversant with all administrative procedures, including WH&S requirements, programmed maintenance schedules and activation emergency calls and dispatch.
